

Superfoss. Super Duplex Axial Piston Pumps High Pressure Pumps for SWRO & BWRO 4 different models up to 11,1 m³/h

Quality.

Superfoss pumps are designed and produced in Denmark by handpicked engineers from the danish pump industry, and manufactured from Duplex and Super Duplex stainless steel ensuring a high pressure pump of highest quality for Seawater Reverse Osmosis Systems

Urgency.

As clean drinking water is a critical resource for any human being. It is vital to secure supply at all times. We do this by stocking our products generously enabling fast delivery times. Availability of our product line can be seen on our website.

Efficiency

Minimum flow resistance through the pump is achieved with a valve plate design instead of check valves. This combined with low friction sliding pairs and hydrodynamic main bearings results in a highly efficient pump.

Affordability.

Using the latest developments tools and modern 5 axis machining makes the pumps affordable to buy. High efficiency and low maintenance makes them affordable to run. Our prices are no secret and can be found on our website.

Model	rpm	Flow			Power requirement kW		
		m ³ /h	l/min	gpm	60 bar	70 bar	80 bar
